

# Clear Water High Pressure (J, JC)

These high pressure pumps provide streams of clear water for jetting, water blasting, wellpoint installation, washdowns and fire protection. This fast action, proven performance series provides flows to 1,600 GPM with pressures up to 173 psi.

## Applications

**Construction:** Wellpoint installation; equipment wash down; pilings; pre-wet operations

**Industrial:** Water jetting and blasting; standby fire protection; piping system surcharging and pressure testing

**Agricultural:** Irrigation; dust abatement

**Marine:** Barge cleaning and wash down; pile jetting; docks and seawall installation

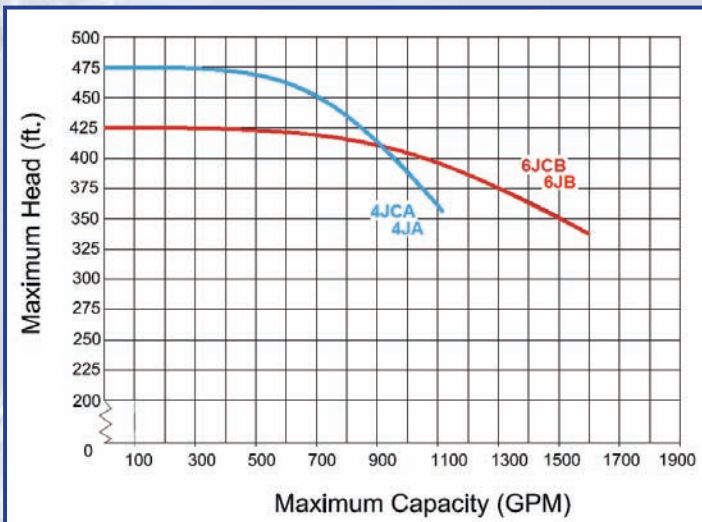

*Alternate pump end materials available for corrosive liquids*

## Model Specifications

Unit Model	Size (In.)	Maximum* Capacity (GPM)	Maximum* Head (Ft.)	Maximum* PSI
4JB & 4JCA*	4	800	275	120
6JB & 6JCB*	6	1,600	425	173

*Consult engineering data for exact maximum performance RPM*

*\*Equipped with Enviroprime® Compressor Assisted Priming System*

6JB

## Features

- High pressure capability for jetting
- End-suction centrifugal pump end
- Heavy duty cast iron casing and brackets
- Bronze impeller and wear rings
- Abrasion-resistant carbon vs. ceramic mechanical seal
- Suction and discharge fittings
- Hand priming devices
- Compressor assisted version with exclusive Enviroprime System® priming
- Vacuum-Assisted version with exclusive Super Suction Priming System available
- Safety shutdown controls
- Strainers or foot valves are available
