SILENT KNIGHT®

Silent Knight®

Silent Knight® sound-attenuated canopy enclosures reduce pump operation sound levels by 20+ dBA. The ruggedly constructed, fully insulated and weatherproof, lockable Silent Knight® covers the complete pump unit while still allowing easy access to inspect and operate it. With exterior sound levels of 70 decibels and below at 7 meters, the Silent Knight® is designed to be used in residential areas and other locations where low sound levels are required. Engineered for durability, ease of operation and maintenance, the Silent Knight® is available on nearly every Thompson Pump model, including some older models which can be retrofitted. These sound-attenuated enclosures are tested under the most demanding methods and meet or exceed CPB standards.

Features

- Reduces pump operation sound levels by 20+ dBA
- Low noise level – at or below 70 dBA at 7 meters
- Ruggedly constructed, fully weatherproof, lockable enclosure covers the complete pump unit
- Drop-over canopy style allows enclosure to be added or removed in the field
- Modular design – common panels allow for adaptation to a variety of pump units
- Large doors allow easy access to the pump and engine
- Lockable push latches maintain security
- Top, side and bottom panels fully enclose the pump and engine
- Rear double doors open without disturbing suction and discharge hoses
- Thick water and oil resistant noise-absorbing panels
- Ideal in residential and other areas where low sound levels are required
- Available on nearly every Thompson Pump model, including some older models
- Sound tested to:
 - ISO 3744
 - ANSI/HI 9.4
 - CPB Noise level testing standard

Improved, Premium Silent Knight®

Thompson Pump announces an improved, premium Silent Knight® sound attenuated canopy with reduced noise level.

The advanced **Silent Knight®** canopy has reduced noise levels on various models by 3-6 dBA. Additional improvements include internal baffles, plug-in float connection, auto start buzzer and flashing beacon light, muffler mounted inside a separate front compartment, added room on inside of main compartment, and hinged pop-up roof for easy servicing. Thompson retained the modular drop-on feature of the canopy to allow for after-market availability and easy installation.

Advanced Silent Knight® Features and Benefits

- Lower Noise Level – 66 dBA @ 23 feet versus 72 dBA @ 23 feet on various models
- More Space – Inside canopy to perform service and repair work
- Hinged Pop-up Roof – For easy servicing
- Internal baffles
- Muffler Mounted Inside – A separate compartment
- Automatic Floats/Plug-in Connection – On exterior of canopy
- Buzzer and Flashing Beacon Light – For automatic start/stop system
- Modular Design – Maintain ability to add canopy after purchase
- EPA Compliant – Comply with EPA Tier 3 temperature requirements
